# Interfaces for Hands-Free Communication System<sup>5</sup>

Keeping you in touch.

The Mercedes-Benz Hands-Free Communication System provides state-of-the art communications technology with the engineering expertise of Mercedes-Benz.

Unlike conventional systems, the Hands-Free Communication System seamlessly integrates into your vehicle and is engineered by Mercedes-Benz to provide optimum reception and sound quality while helping you keep your eyes on the road and your hands on the wheel.

The Hands-Free Communication System is available with a selection of factory option packages offering two ways to take advantage, based on how you use your mobile phone.

## Telephone Cradle<sup>6</sup>

With the Telephone Cradle, your phone is stored securely out of the way, it is continually charged so you never have to worry about a de-pleted phone battery in the car, and it links to an external antenna to provide the best possible reception when placing or receiving a phone call. There are Telephone Cradles available to accommodate a selection of popular mobile phones for most major carriers.

## Bluetooth Interface Module<sup>6</sup>

With Bluetooth technology select phones can be connected wirelessly with the Hands-Free Communication System. You can keep your phone on your belt, in your purse... wherever it's convenient. Bluetooth supports hands-free audio and a variety of call handling functions. Select phones are supported by dedicated "Hybrid Cradles" offering similar functions as the Bluetooth Module with charging functionality and integration with the vehicle's external antenna.<sup>7</sup>

*Regardless of the option that you choose for the Hands-Free Communication System, the experts at Auto Wireless Solutions can help you choose the right phone for your lifestyle and for your E-Class.*

*For a current list of compatible phone models, visit AWS at [www.Wireless4MB.com](http://www.Wireless4MB.com) or call Auto Wireless Solutions at 1-800-910-1021 to speak to an advisor.*

 **Bluetooth®**

<sup>5</sup> Always plug an approved phone into the cradle for use inside the vehicle or use the approved Bluetooth interface. Otherwise operating a non-approved phone or radio transmitter with its own attached or built-in antenna while the engine is running can interfere with the vehicle's electronic systems. For safety reasons, the driver should not use the cellular phone while the vehicle is in motion. We encourage the driver to stop the vehicle in a safe location before answering or placing a call. See your Mercedes-Benz dealer for current handset availability.

<sup>6</sup> Telephone Cradle and Bluetooth Interface Module are sold separately and offer a one year warranty. Bluetooth application for approved phones only.

<sup>7</sup> Please see dealer for details about specific cellular handsets compatible with hybrid cradles.

# Mercedes-Benz Navigation Systems<sup>8</sup>

More than a map.<sup>TM</sup>

- ▶ Solutions that take the worry out of finding your way.

The fully integrated Mercedes-Benz COMAND Navigation System<sup>9</sup> or the full-featured Mercedes-Benz Portable Navigation Solutions – which can be relocated for use in multiple vehicles or other recreational vehicles – can help you plan trips, navigate detours and help you find your way.

Access maps that cover millions of miles of roads in the United States and Canada. Choose from a vast section of Points of Interest in numerous categories including Shopping, Restaurants, Gas Stations and ATMs.

Mercedes-Benz has a solution for almost any navigation requirement.

*Mercedes-Benz Portable Navigation Solutions:  
ask your dealer how they can help you find your way in unfamiliar territory.*

## Navigation Update Disk<sup>8</sup>

Your Mercedes-Benz COMAND Navigation System relies upon a detailed electronic map to guide you to your destinations and help you find the services and attractions that you need and want in your daily life. But things are constantly changing out there. Roads are added or diverted, restaurants open and close, hotels and hospitals are built, ATMs move. In fact, as much as 20 percent of the navigation data is updated every year. That is why Mercedes-Benz offers updated navigation data, available for purchase from your authorized Mercedes-Benz dealer, to help ensure that you always have current navigation information.

<sup>8</sup> COMAND Navigation system data represents the 48 contiguous United States, plus Hawaii (Oahu only) and Canada. Portable Navigation Devices system data may represent the 48 contiguous United States and Canada excluding Alaska and Hawaii. Directional assistance provided only when GPS coverage is available. Maps do not cover all areas nor all routes within an area. While the navigation system provides directional assistance, the driver must remain focused on safe driving behavior, including paying attention to traffic and street signs. The driver should utilize the system's audio cues while driving and should only consult the map or verbal displays once the vehicle has been stopped in a safe place. See your dealer for details.

<sup>9</sup> Also available as dealer installed.
