The R-Class takes care of your dearest valuables. After all, your real riches

The R-Class represents the very finest virtues. A love of the family, for example: no other passenger car from Mercedes-Benz gives your nearest and dearest this much space. The standards of uncompromising quality you demand are evident in the finest workmanship of beautiful materials. The R-Class assumes responsibility with its assistance systems. It can

increase the safety of the occupants and show consideration for other road users. Numerous BlueEFFICIENCY measures help to ease the burden on the environment. The R-Class. A car beyond reproach. And quite rightly a king amongst family cars.

## A kingdom with seven thrones

Allow us to introduce: the smallest kingdom in the world – or the most spacious car we've ever built. The R-Class fulfils discerning requirements regarding space, comfort and quality for up to seven people. Because *noblesse oblige* – as does the name Mercedes-Benz.

The R-Class takes care of your dearest valuables, its generous dimensions playing but a small part. If you wish, it can monitor the blind spot, as well as helping you to maintain the desired distance from the vehicle in front. After all, your real riches are not to be found in your bank account – they're on the back seat.

Built for your most treasured possession.  
Your family

His Majesty in fine robes

The R-Class displays a regal stance with its wide, upright radiator grille. The charismatic headlamps are focused firmly ahead. With fine beltline trim strips and elegant door handles it sets a shining example in chrome. It's evident in every detail: the R-Class comes from good stock.

## R the Great

An extra measure of greatness. The long-wheelbase version of the R-Class offers even more room in the second and third rows. Even the sliding sunroof steps up a size: as an option, you can have a panoramic sliding sunroof that stretches over virtually the entire area of the roof. There's room for everything in the R-Class.

## Your wish is its command

You can do as you please here to your heart's content. The interior concept of the R-Class is exceptionally flexible. Each rear seat can be folded down individually. And you can even create a flat load surface should you ever need it. This is precisely how it should be: a car that listens only to your wishes.

You reign supreme in  
the front. Free rein for  
the children in the rear

Modesty is a virtue displayed by the R-Class, too. At least where consumption is concerned: a low drag coefficient and numerous BlueEFFICIENCY measures all do their bit. Efficient mobility is our crowning glory.

Building a generously dimensioned car is one thing. But combining legendary standards of comfort with high agility is not something very many manage at this level. The R-Class impresses with dynamism of a calibre you wouldn't necessarily expect of a car with these proportions. But a Mercedes is the exception.

There are palaces aplenty.  
But only a select few have four wheels

You like travelling in a more distinguished fashion? The R-Class is your private jet for the road: up to three rows of seats, plenty of legroom, armrests, cup holders, two optional screens for the second seat row. Plus an individually adjustable air conditioning system – as an option in the rear, too. In fact, the only thing we haven't included is numbering for the seats.

The first Mercedes that's  
every inch a king

Why not simply take your entire  
entourage with you?

“Papa Benz”, as he was lovingly and respectfully known to many of his contemporaries, was not just the father of the motor car – he was also the proud father of five children. They always supported him in any way they could. The eldest, for instance, accompanied him on those very first test drives – not in the car, though. Off Eugen would go, petrol can in hand, whenever the fuel ran out. For whilst the carriage had an engine, there was no petrol tank at the outset. Even when it came to the regular test runs through Mannheim at night the family proved indispensable. The pioneer required assistance pushing the car and starting the engine, and sometimes he needed even more help when it came to driving home, a procedure which would often turn into pushing home on the initial attempts.

As we travel in comfort from A to B in the cars of today, there is no trace of all the effort involved in those early days. Thanks to an ingenious inventor and his family of seven. It’s for families such as these that we build the R-Class.

For Karl, Bertha, Eugen, Richard, Klara, Thilde and Ellen

## On the art of creating a clean diesel

Seen up close, BlueTEC is the most natural thing in the world. Because what looks like a shimmering precious stone here is in reality nothing more than crystallised urea under the microscope.

There's a very good reason why engineers at Mercedes-Benz – as well as naturopaths – scrutinise this wondrous organic compound. Urea is the main component of AdBlue® – the all-important fluid in the fight against diesel emissions. In our BlueTEC models, AdBlue® is injected into the prefiltered

exhaust gas flow. The urea binds the remaining nitrogen oxides through a natural chemical reaction and reduces them by up to ninety percent, leaving only harmless nitrogen and water.

This all sounds pretty easy, one might think – not rocket science. But isn't that always the way with revolutionary ideas? It's just a matter of coming up with them. So if your Mercedes should pass water in future, it's because we have such clever engineers. There's nothing to worry about. It's only natural.

## BlueEFFICIENCY – fast forward to tomorrow

We are quicker at getting environmentally friendly future technologies to where it matters most: on the road. As the inventor of the motor car, Mercedes-Benz has a special responsibility – one we have undertaken with all our might for many years. By the end of 2011, we will be able to offer you 128 models with BlueEFFICIENCY technologies, all of which help you reduce your impact on the environment – without compromising on safety, comfort and driving enjoyment.

Our BlueEFFICIENCY concept comprises innovations for efficient mobility as well as optimised processes all the way along the value chain. They involve different approaches, but they all have a common goal: to make your individual mobility as sustainable as possible.

**The BlueEFFICIENCY measures – the Mercedes-Benz efficiency package.** This package consists of comprehensive vehicle optimisations designed to save fuel and ease the burden on the environment. Each model combines the most

efficient engine with latest-generation aerodynamic and energy-management measures to minimise fuel consumption. Such measures include intelligently controlled ancillaries, tyres with optimised rolling resistance, lightweight components and the ECO start/stop function, which is being made available for an increasing number of models. The new BlueDIRECT V6 and V8 petrol engines, which feature in several model series, deliver a much higher power output while reducing fuel consumption by up to 24%.

**BlueTEC – the clean diesel.** Mercedes-Benz has brought to market BlueTEC technology for diesel engines based on common-rail direct injection (CDI). A modular emission-control system makes BlueTEC an exceptionally clean diesel technology, as not only does it remove up to 95% of the particulate from the exhaust gases, it also reduces nitrogen oxides by up to 90%. What remains is mainly water, nitrogen and the satisfying feeling of having helped to ease the burden on the environment.

**HYBRID – petrol and electric drive** intelligently combined. A well-established team makes a lot of things easier. As shown by HYBRID technology. Here the electric motor is used for the recuperation of kinetic energy. This energy is stored in the battery and returned to the electric drive when needed, which assists the petrol engine when the car is accelerating. What's more, the ECU shuts off the petrol engine when the speed is below 15 km/h. In this way, a HYBRID can reduce fuel consumption by up to 20%. So it looks after the environment as well as your bank balance. Perfect teamwork, you might say.

The BlueEFFICIENCY measures bring about a substantial reduction in fuel consumption and CO<sub>2</sub> emissions

**BlueTEC HYBRID – clean diesel combined with electric drive.** It marries the benefits of the HYBRID with those of BlueTEC: during braking, the kinetic energy is converted into electrical energy, which can be re-used when required. At the same time, the BlueTEC technology cleans the exhaust gases and removes many of the pollutants. All of which makes the economical diesel powerplant even more efficient, agile and clean.

We are using **BlueTEC HYBRID technology** to develop a diesel hybrid based on the E-Class

**Innovative drive systems that break new ground: E-CELL and F-CELL.** Mercedes-Benz has developed two locally emission-free drive systems known as the E-CELL and F-CELL. The B-Class F-CELL is already being produced on a small scale and has been displaying its everyday practicality on Germany's roads since mid-2010. It uses hydrogen to produce power for the electric motor in a fuel cell. The first vehicles from a small series of the A-Class E-CELL – which features an electric motor that draws its energy from two lithium-ion batteries, giving it an average range of more than 200 km – began rolling off the

The A-Class **E-CELL** allows locally emission-free driving with a battery-powered electric motor

production line at the end of 2010. An E-CELL PLUS is also scheduled for release, which will include a small internal combustion engine combined with a generator to increase the range of the electric vehicle.

But that is not all: under the banner “Design for Environment”, we also look at a vehicle's entire lifecycle and work hard to preserve the environment from the planning stage right through to recycling. The same applies to the building and running of new plants. In addition, we are heavily involved in the development of alternative fuels and carry out research in the field of bionics. In short, BlueEFFICIENCY is good news for both you and the environment.

Further information about our comprehensive measures can be found at:

[www.mercedes-benz.com/blueefficiency](http://www.mercedes-benz.com/blueefficiency)

## Diesel engines

Powerful, quiet and clean with impressive fuel-consumption figures: the R-Class also signals the launch of the latest Mercedes-Benz diesel technology

**V6 engines.** The enhanced BlueTEC technology in the R 350 BlueTEC 4MATIC<sup>1</sup> with 155 kW is particularly low on emissions. BlueTEC is the name given to the technology developed by Mercedes-Benz for effective cleaning and after-treatment of exhaust gases from diesel drive systems. The modular system ensures exemplary values for all the exhaust-gas constituents as well as impressing by sustainably reducing nitrogen-oxide emissions. In practical terms, this means that BlueTEC already more than meets the emissions requirements of the less immediate future (Euro 6). Add to that lower

consumption coupled with effortlessly superior performance and a hefty torque of 540 Nm, and it's clear that the R 350 BlueTEC 4MATIC leads by example.

The R 350 CDI 4MATIC developing 195 kW features the most powerful V6 diesel engine with common-rail technology available for the R-Class. Precise and fast piezo injectors, a high injection pressure of up to 2000 bar and a huge maximum torque of 620 Nm – it all adds up to supreme pulling power. Not to mention very good traction performance thanks to the combi-

nation with the standard-specification all-wheel-drive system 4MATIC, available in all versions. At the same time the engine runs smoothly, economically and cleanly, as you would expect from a state-of-the-art unit that complies with the Euro-5 emissions standard.

Efficiency is also the watchword where the R 300 CDI BlueEFFICIENCY<sup>2</sup> is concerned: with its systematic lightweight construction, the engine comes complete with common-rail diesel technology. It offers a respectable output (140 kW) and a high torque of 440 Nm, even at

<sup>1</sup> Only available as R-Class long-wheelbase version <sup>2</sup> Not available as R-Class long-wheelbase version

low revs, coupled with consumption and emission levels which meet the requirements of the Euro-5 emissions standard. But that is not all: the measures integral to this model, such as tyres with low rolling resistance, intelligently controlled ancillaries and optimised aerodynamics, all help to boost the vehicle's efficiency.

The 6-cylinder diesel engine in the R 350 CDI 4MATIC has supreme pulling power on tap in every driving situation

The R 350 BlueTEC 4MATIC achieves its maximum torque of 540 Nm as early as between 1600 and 2400 rpm

## Petrol engines

There are three powerful and appropriately efficient petrol engines to choose from for the R-Class

Refined power is a trait of all the 6-cylinder petrol engines for the R-Class

<sup>1</sup> Only available as R-Class long-wheelbase version

The R 300¹ impresses with high pulling power over a wide engine speed range

**V6 engines.** The 6-cylinder engines with 4-valve technology in the R 300¹ and R 350 4MATIC embody refined power. The maximum torque of 300 and 350 Nm respectively facilitates immediate power delivery over a particularly wide engine speed range, which means that impressive reserves of power are available in every driving situation, ensuring relaxed motoring. A further defining characteristic of the V6 engines is their efficient use of fuel. Behind this lie four variable camshafts which are continuously controlled as required, so that precisely the correct amount of fuel is called upon for the driving

situation in hand. The R 300<sup>1</sup> has an output of 170 kW, the R 350 4MATIC 200 kW, and both engines meet the requirements of the Euro-5 emissions standard.

**V8 engine.** Simply outstanding. One way to describe the flagship powerplant in the R-Class range: the R 500 4MATIC<sup>1</sup>. Effortless superiority and smooth running characteristics are the major strengths displayed by this powerful V8 engine. Responsible for the high performance potential are the lightweight-construction materials such as magnesium, which are also used in

the world of motorsport, and the optimised air supply plus four valves per cylinder. This is how the 8-cylinder powerplant develops its rated output of 285 kW and achieves a peak torque of 530 Nm, which is available over a wide engine speed range from 2800 to 4800 rpm. The R 500 4MATIC<sup>1</sup> accelerates from 0 to 100 km/h in 6.3 seconds and reaches a governed top speed of 250 km/h. This petrol engine also meets the requirements of the current Euro-5 emissions standard.

## Transmissions

The intelligent 7G-TRONIC automatic transmission constantly adapts to meet the requirements of the current driving situation and the individual driving style of whoever is at the wheel

**7G-TRONIC.** The R-Class comes as standard with the 7G-TRONIC automatic transmission, operated via the DIRECT SELECT lever on the steering column. The seven forward gears allow an ideally adapted engine speed at all times, cutting fuel consumption, which is further reduced by the 7G-TRONIC PLUS in the R 350 CDI 4MATIC and R 300 CDI BlueEFFICIENCY. Shorter shift times and smoother shifts make gear changes easier and reduce noise levels. Driving enjoyment is also enhanced: the car benefits from better acceleration and boasts more pulling power. What's more, gears can be skipped for fast in-gear acceleration.

**DIRECT SELECT.** The R-Class features the intuitively operated DIRECT SELECT lever on the steering column instead of the conventional automatic selector lever in the centre console. You can select the automatic transmission modes P, N, R and D by moving the lever up or down and at the push of a button. The function commands are transmitted purely electronically. Manual shifting is also possible – via the standard-specification shift paddles on the steering wheel. This means that drivers can decide for themselves whether to control gear changes manually via the steering-wheel gearshift paddles or to leave it up to the automatic transmission.

The freedom to make decisions is just one of many comfort features the R-Class has to offer.

DIRECT SELECT lever

The 7G-TRONIC PLUS: one of over 18 million Mercedes-Benz automatic transmissions produced in a period spanning more than 50 years

## Chassis and suspension

4MATIC permanent all-wheel drive provides impressive traction as well as enhanced driving stability. The chassis and the AIRMATIC air suspension really come into their own on the road, offering a high level of comfort as well as exceptional agility

**4MATIC** (depending on model). As 4MATIC is always active, it responds virtually instantaneously in poor weather conditions such as rain, black ice or snow. 4MATIC is assisted by the Electronic Stability Program ESP® and the electronic traction system 4ETS with the integral ABS and ASR functions. 4ETS enables controlled braking of spinning wheels and, as a consequence, increases the drive torque at the wheels offering good

traction, allowing plenty of power to be planted on the road when moving off and when accelerating, especially on poor road surfaces. 4MATIC makes conventional differential locks superfluous: the automatic braking pulses make it easier to move off on slippery ground as well as enhancing stability during critical manoeuvres. A further advantage of the system is the fact that it is hardly any heavier than the rear-wheel-drive

version on account of the compact design, intelligent choice of materials and high level of efficiency.

**Direct-Steer system** (standard). The Direct-Steer system features a steering ratio that becomes increasingly direct the greater the steering angle, and it reduces the steering effort required for large steering angles, for example when parking

The electronic traction system 4ETS automatically sends the drive torque to the wheels offering sufficient traction

or negotiating tight bends. This increases the vehicle's agility and steering comfort through precise steering characteristics and good feedback. The electrohydraulic power steering in the R 300 CDI BlueEFFICIENCY and R 350 BlueTEC 4MATIC also helps to save fuel.

**AIRMATIC** (option). AIRMATIC air suspension, with adaptive shock absorbers, adjusts itself in line with the current road conditions, vehicle load and driving situation. The driver can select either comfort-oriented or sporty settings manually. Or the system will switch to stiffer settings of its own accord, while the level of the car can also be altered as required at the touch of a button.

AIRMATIC air suspension helps to maintain a constant ground clearance, even if the car is carrying a heavy load

## Safe driving

In the “safe driving” phase, vehicle systems can be activated in order to prevent an accident. Like the assistance systems in the R-Class, for example: their awareness can defuse even critical situations and so forms an ideal basis for relaxed driving

**Blind Spot Assist** (option). The Blind Spot Assist system monitors the area which the driver finds difficult to see directly beside and behind the vehicle – in short: if the assistance system detects the danger of an impending collision with another vehicle when changing lane, the driver is warned by a signal in the exterior mirror from a speed of 30 km/h. If the driver

Blind Spot Assist uses two radar sensors to monitor the blind spot

uses the indicator in a situation like this, an additional audible warning sounds. This also occurs if the system detects that another vehicle is moving from the next-but-one to the next lane.

DISTRONIC can make the driver's job easier and improve driver-fitness safety

**DISTRONIC** (option). The DISTRONIC adaptive cruise control uses a radar sensor to help the driver maintain the set distance to the vehicle in front in a speed range of 0 to 200 km/h. This takes a lot of strain off the driver, particularly on motorways, on roads with motorway-like conditions and in heavy traffic: if the system recognises that your R-Class is approaching a slower vehicle ahead, it decelerates or activates the brake of its own accord. When the road is clear again, DISTRONIC continues to work like conventional cruise control.

**Bi-xenon headlamps with LED daytime driving lights** (option). Excellent visibility and light conditions are ensured thanks to the combination of bi-xenon headlamps and LED daytime driving lights. The latter comprise two lamps, each with seven light-emitting diodes, to make them more easily visible to other road users. They are also available on their own as optional

extras. Further advantages include low electrical consumption and a long life. And last but not least, the innovative design and sophisticated light pattern enhance looks. The bi-xenon headlamps offer better light intensity, a greater beam range and wider illumination than conventional headlamps.

Thanks to the LED daytime driving lights other road users can see the vehicle more easily

The electric headlamp range control prevents drivers in oncoming traffic from being dazzled, whilst the headlamp cleaning system keeps the headlamps free of dirt.

**ESP® incl. trailer stabilisation** (standard). While towing, trailer stabilisation gives the driver further support in addition to that provided by the standard-fit Electronic Stability Program ESP®. If the trailer starts swinging back and forth when on the move, this intelligent system can recognise the problematic driving situation and apply short brake actuations to stop the trailer movement promptly.

## Detect hazardous situations. And be prepared for possible collisions

If you're on the road, you will probably encounter a hazardous situation sooner or later: for this eventuality, numerous systems have been developed for the R-Class to help prevent possible accidents and provide even more effective occupant protection in the event of a collision

**PRE-SAFE® system** (standard). The anticipatory occupant protection system is able to detect certain critical driving situations in advance and activate preventive measures. If an imminent accident is detected, the system can close the side windows, move the front passenger seat to a more favourable position and tension the front seat belts automatically. It can also close the sliding sunroof, if fitted, and provide lateral support for the occupants if the multicontour seats are specified.

The anticipatory occupant protection system PRE-SAFE® can recognise critical driving situations and initiate preventive measures in order to protect the occupants

**Airbags** (standard). Fitted as standard inside the R-Class are six airbags which can help prevent – or reduce the severity of – injuries in case of a collision. Passenger protection measures include two adaptive front airbags with two-stage deployment, depending on the projected accident

Standard equipment includes windowbags for all three possible seat rows plus airbags & sidebags for the driver & front passenger

impact. The R-Class also has sidebags in the front seat backrests for the driver and front passenger, plus two large windowbags extending over each of the three seat rows that are possible. Sidebags for the second row of seats are also available as an option.

The flexible side bolsters on the NECK-PRO luxury head restraints can be adjusted by hand for the driver and front passenger

**NECK-PRO head restraints** (standard). The crash-responsive NECK-PRO head restraints improve occupant protection and help to reduce the risk of whiplash injury. If a rear impact is detected, the head restraints are pushed forwards by around 40 millimetres and upwards by 30 millimetres, thus providing support for the heads of the front seat occupants at an earlier stage. The flexible side bolsters on the optional NECK-PRO luxury head restraints provide additional lateral support for the head, whilst also enhancing seating comfort.

## Seating variants

Ready for any challenge: the variable interior concept with up to seven seats

Comfort from front to back: Executive Chairs in the generously sized rear

**5-seater** (standard). You always travel first-class in the R-Class – even in the second row. The luxurious individual-seat concept enhances ride comfort for all the passengers. With its two Executive Chairs, the rear is as inviting as the front when it comes to the levels of space and comfort on offer. There is also a comfortable centre seat, which can simply be folded down if you wish, in which case it serves as a practical, comfortable centre armrest.

**4+2-seater** (option). This configuration includes a rear centre console for the second seat row, featuring two cup holders and numerous stowage facilities. Meanwhile, the fore-and-aft-adjustable Executive Chairs also have two armrests each. So the already generous amount of space for the rear passengers can be increased even further. The third row offers two more

seats, both of which can be folded away as required.

**5+2-seater** (option). As in the 4+2-seater, you reach the individual seats in the third row in comfort courtesy of the EASY-ENTRY system, which is automatically integrated in both variants.

Six pack: the 4+2-seater with six comfortable individual seats

Even with seven people on board there is still room for some light luggage. In addition to this the 5+2-seater is equipped with air suspension and level control on the rear axle as standard.

Particularly generous – particularly flexible: the 5+2-seater with its folding centre seat

## Folding variants

Manifold possibilities – the variable interior concept of the R-Class in detail

You can transform the interior into a flat load area in just a few simple steps

**Flexibility.** To enable you to derive maximum benefit from the generous R-Class interior, we have developed an innovative individual-seat concept. Its main advantage is that each rear seat can be folded forward separately. As well as the standard-fit five-seat configuration, you also have the option of two, three, four, six or seven seats.

**Child seat concept.** The R-Class effortlessly achieves top marks as a family car, too. In the second row of seats there is room for up to three child seats next to each other. The two outer seats have ISOFIX attachment systems which make it possible to anchor the child seat directly to the car's body. Because safety is a big priority for us when it comes to your smallest passengers.

**Spaciousness.** If there are five of you in the car, there's still room in the boot for six large suitcases – more than sufficient for five people. A few steps are all it takes to make full use of all the space the R-Class has to offer: simply fold forward the seat cushions and backrests in the second and third rows. This won't create any steps or recesses – just the type of load area you'd

expect to find in a delivery van rather than a luxury saloon.

The innovative individual-seat concept in the R-Class

One by one: each seat can be folded forward individually

## Load compartment

Luxury means not having to do without anything – especially luggage

In the end only comfort counts: the EASY-PACK system helps you when loading up

**EASY-PACK system** (option). The R-Class makes light work of heavy luggage: the EASY-PACK load compartment management system makes loading and stowing as easy as can be. The EASY-PACK tailgate available as an option opens and closes at the touch of a button, and can be stopped in any position – very handy for avoiding contact with low garage ceilings, for instance.

**Load compartment.** Open up the tailgate and you will find that a luxurious amount of space with a total of up to 2001 litres of load capacity (or 1950 litres in the 4+2- and 5+2-seater) comes as standard. A load compartment length of nearly two metres means that you have enough space for almost anything – whether you want to take the bicycles on holiday with you or find yourself having to transport a bulky sofa. A high-quality velour covering means that your

luggage can also travel in style. The optional load compartment cover helps keep things looking neat and tidy and also protects your possessions from prying eyes.

**Load compartment floor.** The 5-seater R-Class comes with a large load compartment flap recessed into the load compartment floor as

Safety and comfort rolled into one: optional partition net for occupant protection and load retaining

standard, adding a 51-litre stowage compartment to the already generous luggage space (not included in the 4+2- or 5+2-seater).

Room for more: there is a generous stowage area beneath the load compartment

## Multimedia systems

As an option the R-Class offers an entire programme of entertainment, including such features as the Rear Seat Entertainment System or the COMAND APS multimedia system. Meanwhile, the Harman Kardon® Logic 7® surround sound system, also available optionally, sets the tone perfectly

**COMAND APS** (option). The COMAND APS multimedia system combines a radio and MP3 player with a hard-disc navigation system including high-resolution map display and TMC PRO dynamic route guidance. Three years' updates for your map data are included (vehicle-specific, from date of first registration). The system shows all the information you need on a 16.5 cm

The COMAND APS is extremely easy to use

central colour display. The DVD drive brings you the best in entertainment, and as well as video and audio DVDs it also plays CDs and MP3 files. What's more, there is a further 4 GB of memory on the hard disc for audio files in MP3 or WMA format. And an SD memory card slot and Aux-in connection are included in the standard specification. All the major functions can also be

The two displays for the Rear Seat Entertainment System are mounted on the front-seat head restraints

called up via the voice-operated control system LINGUATRONIC.

**Rear Seat Entertainment System** (option). The Rear Seat Entertainment System comprises a DVD player, two 20.3 cm TFT colour displays on the front head restraints, two sets of wireless headphones, remote control and two Aux-in sockets, allowing the rear passengers to watch films or connect a games console during the journey. Both displays can be used independently of one another. Thanks to the optionally available TV receiver passengers in the R-Class can even watch currently broadcasting television programmes.

## Assistance systems

Assistance systems provide additional convenience in the R-Class. Parking is now child's play, thanks to PARKTRONIC and the reversing camera

**PARKTRONIC** (option). The PARKTRONIC parking aid helps the driver when parking and manoeuvring in tight spaces. If PARKTRONIC detects that there is not enough space available in front of or behind the vehicle, it can warn the driver by giving visual signals. These are accompanied by audible signals if the distance is below 35 cm. The system works according to the echo-sounder principle; a total of ten sensors send out ultrasound signals which are reflected by other vehicles or obstacles.

**Reversing camera** (option). Available as an option, the reversing camera can likewise make parking easier. Its wide-angle lens is integrated in the handle on the tailgate. The reversing camera is automatically switched on when reverse gear is engaged, and shows on the COMAND

display exactly what it detects in the area immediately behind the vehicle, so it helps make reverse parking easier and safer by giving the driver a better view of the area surrounding the

car's tail end. The reversing camera is available exclusively in conjunction with COMAND APS.

The reversing camera films the area around the tail end of the car

## Climate control

An ideal interior climate is paramount when it comes to ensuring a high level of stress-relieving safety. The climate control system for the R-Class is therefore exceptionally versatile and can be adjusted to meet the needs of each individual occupant

**THERMATIC** (standard). The THERMATIC automatic climate control system uses sensors to control the air distribution, temperature and ventilation automatically and separately for the left- and right-hand side of the interior (2 climate zones). In accordance with the preselected temperature and the desired air distribution, the air is cooled or heated automatically, making the system very easy to operate. This automatic control process can be manually overridden if required. Further standard-fit features include air recirculation and the combination filter (dust and activated charcoal filter), which keeps particulate matter at bay and improves the overall air quality.

**THERMOTRONIC** (option). The THERMOTRONIC luxury automatic climate control system allows the driver, front passenger and rear passengers each to set the temperature using their own controls. An additional booster blower beneath the centre console ensures the ideal temperature in the rear. What's more, further sensor signals are included in the control system in order to create a pleasant interior climate.

The controls for the THERMOTRONIC luxury automatic climate control system are ergonomic and intuitive

**Rear climate control** (option). In conjunction with THERMOTRONIC, the separate air conditioning system in the rear enhances climate comfort for the rear passengers. This is a welcome addition, especially if the vehicle is equipped with three rows of seats.

The desired temperatures and airflow can be set precisely using the control unit in the rear

# Seats

The exclusively designed seats in the R-Class meet the highest standards and provide impressive levels of comfort on long journeys

**Multicontour Seat package** (option). The multicontour seats offer a high level of comfort on long-distance journeys. The seat height and seat-cushion and backrest angles are all electrically adjustable. Individual air chambers are pressurised in line with the current driving situation to provide more stability and lateral support in the lumbar area, in the backrest side bolsters and in the front section of the seat cushion.

The multicontour seats for the driver and front passenger meet all your individual ergonomic seating needs

**Memory package** (option). The front seats are available with full electrical adjustment as an optional extra (including 4-way lumbar support for the front passenger seat). The switches for this are clearly arranged in the seat console. If the Memory package is ordered, three position settings can be stored for the driver's seat, steering column and exterior mirrors.

Memorised settings can be restored quickly and accurately at the mere touch of a button

**Rear centre console** (option). A removable rear centre console with two cup holders and numerous stowage facilities is available for the 4+2-seater. When closed the lid serves as an armrest housing a compartment with seven litres of stowage space.

The rear of the 4+2-seater R-Class with the optional rear centre console in the second seat row

## Long-wheelbase version

An extra measure of greatness. 235 millimetres, to be precise

Vehicle of unlimited possibilities: the long-wheelbase version stretches over 5.16 metres

It's hard to beat the R-Class when it comes to spaciousness and comfort. Unless, that is, you decide to go for the long-wheelbase version of the R-Class. As the driver you'll barely notice the difference of 235 mm – but your passengers certainly will. If six or seven people are on board, those in the third row in particular will be more comfortable. And it goes without saying that the boot capacity also increases proportionately – by 414 l.

When only the first and second seat rows are in use, the load capacity is 1118 l for the 5-seater (1067 l in the 4+2-seater and 5+2-seater). In the 4+2-seater and 5+2-seater the seats in the second row can be moved to create a distance of up to 990 mm to the front seat row – a degree of spaciousness and comfort comparable to that found in luxury saloons. The telling difference

in the R-Class? In 2-seater configuration, the long-wheelbase version can offer a maximum load capacity of up to 2436 l (2385 l in the 4+2- and 5+2-seaters), whilst the maximum loading

length grows to 2.19 m. So now there's no stopping you whenever you feel like a spur-of-the-moment trip to the coast with your surfboard.

More legroom and headroom in the rear

## Standard equipment | Selection

Instrument cluster in 3D look, with white scale

Stowage compartment in the front armrest

Front door sill panels in stainless steel

Stowage space beneath load compartment floor (for 5-seater)

Daytime driving lights and front fog lamps ringed in chrome

Tail light featuring LED and fibre-optic cable technology

## Optional extras | Selection

Media Interface socket in glove compartment

NECK-PRO luxury head restraints (for first and second seat row)

EASY-PACK tailgate

EASY-ENTRY function (for 4+2- and 5+2-seater)

Roller sunblind, rear side window (for second seat row)

Panoramic sliding sunroof

## Chrome package

Polishes your look – the Chrome package available as standard

The Chrome package further enhances and distinguishes your R-Class: the window frames and the beltline trim strips are appliquéd in high-gloss aluminium. The door handles and rub strips are painted in the vehicle colour

and feature chrome highlights (chrome highlights for door handles in conjunction with KEYLESS-GO). The simulated underguard at the front end sports a chrome look. All of this, fitted as standard at the factory, makes the

R-Class a seriously sporty and attractive proposition. Allowing the driver to shine just as the car does.

Dynamic: the simulated underguard with its chrome look

Elegant: door handles in vehicle colour with chrome highlights

Small details make a big impression: an array of chrome highlights accentuates the striking lines of the R-Class

## Sports package

The Exterior Sports package emphasises the muscular lines of the R-Class; the Interior Sports package adds an athletic touch to the passenger compartment

The masculine front and the wide radiator grille take the road by storm. And the rest is pretty powerful and distinctive, too: the Exterior Sports package

**Exterior Sports package.** The defining features of the R-Class with the Exterior Sports package are the 5-twin-spoke light-alloy wheels with 265/45 R 20 tyres all round and rear air suspension, plus the blue tinted windows.

**Interior Sports package.** Opt for elegant sportiness in the passenger compartment, too. The package comprises electrically adjustable front sports seats with an Alcantara®/ARTICO man-made leather upholstery combination featuring contrasting topstitching, a sports steering wheel and the Interior Light package.

Aluminium trim and sports pedals in brushed stainless steel with rubber studs also add to the dynamic character.

The sports seats in Alcantara®/ARTICO man-made leather

Palpably more dynamic: Interior Sports package

## AMG Interior Sports package

We proudly present: possibly the world's most elegant fitness room

Dynamism at your fingertips: AMG sports steering wheel with steering-wheel gearshift paddles

**AMG Interior Sports package.** Exclusive sportiness for the R-Class is yours to enjoy courtesy of the Interior Sports package from Mercedes-AMG. A feeling of dynamism is imparted, for instance, by the electrically adjustable AMG sports seats with a multicontour function for the driver and front passenger, and also by the AMG sports steering wheel with steering-wheel gearshift paddles for changing gear manually. The seats, armrests and handles in the doors as well as the armrest between the front seats are covered in nappa leather. The athletic look is enhanced by trim in aluminium and sports pedals in brushed stainless steel with rubber studs. Additional exclusive features include the Interior Light package and AMG floor mats.

AMG sports seats in nappa leather with a multicontour function

## Upholstery and trim

The black colour scheme offers a choice between seat covers in ARTICO man-made leather/Aspen fabric (standard) and seat upholstery in ARTICO man-made leather (optional, standard in the R 500 4MATIC) or leather (optional). Meanwhile, the interior (dashboard, centre console, door centre panels and carpet) is all in black. If the Interior Sports package is selected as an option, the seat upholstery is in a combination of Alcantara®/ARTICO man-made leather with topstitching in a contrasting colour. In conjunction with the optional AMG Interior Sports package, the seats as well as the door centre panels, handles and armrests are trimmed in black AMG nappa leather.

## Genuine accessories

Practical, versatile, generous – there's not much the R-Class can't do. And there are always the genuine accessories from Mercedes-Benz

The elegant, versatile roof box is available in two sizes: 450 or 330 litres

The New Alustyle basic carrier bars form the versatile basis for all Mercedes-Benz transportation and leisure solutions. They can be combined with a wide range of different roof attachments, such as roof boxes, ski and snowboard racks or bicycle racks. Made of aluminium, the aerodynamic basic carrier bars are very light, perfectly tailored to the body of the R-Class and easy to mount. You might like to pair them up with an elegant, high-quality roof box, which has a capacity of around 450 or 330 litres. The ideal transportation solution for all seasons, whether you want to take skis, snowboards, diving equipment, camping gear or luggage with you. The roof boxes can be opened on both sides and are available in a range of colours.

The roof spoiler serves as an elegant visual extension of the roof line, making your R-Class appear even more compact and powerful from behind, yet without restricting the driver's field of vision. The roof spoiler can be painted in every colour shade available for the R-Class and is easy to fit.

Roof spoiler

The high-gloss chromed door handle recesses add a gleaming touch to your R-Class's chrome finish. They are of high practical value, guarding the paint in the handle recesses against scratches. The custom-fit inserts are available either just for the front doors or as a set of four.

High-gloss chromed door handle recesses

The KidFix<sup>1</sup> child seat is the ideal place for children aged from about 3½ to 12 (15 to 36 kg) to enjoy the ride and offers a high level of protection. The seat booster and the height-adjustable backrest ensure outstanding side impact protection. In addition to the 3-point seat belt, the KidFix<sup>1</sup> can be directly mounted to the car's body using ISOFIX child seat attachment points in the second seat row.

KidFix<sup>1</sup> child seat with automatic child seat recognition and ISOFIX attachment system

<sup>1</sup> Optionally available with "DaimlerSquare" cover

## Services

**Mercedes-Benz Museum.** 125 years of automotive history in one place – this is what awaits you at the Mercedes-Benz Museum in Stuttgart. Experience the unique excitement, and embark upon a thrilling journey through time. Housed inside an architecturally impressive building, over 1500 exhibits on nine levels give you an insight into the unique tradition and powers of innovation of the Mercedes-Benz brand. See the world's first two automobiles in the shape of the Benz Patent-Motorwagen (motor car) and the Daimler motorised carriage – both from the year 1886. Two linked circuits take you from the beginnings of the automobile, past a series of unforgettable classics and on to a glimpse of what the future holds – in an area covering a total of 16,500 square metres. Enjoy the unique brand experience. We look forward to your visit. Further details can be found at [www.mercedes-benz-classic.com/museum](http://www.mercedes-benz-classic.com/museum)

**MercedesCard.** The card is your ticket to the Mercedes-Benz experience. Four times a year, we will send you the Mercedes Magazine, featuring fascinating reports from the world of Mercedes-Benz and articles about our latest vehicles. A MercedesCard also has many other uses too. As a VISA credit card, it is an internationally accepted means of payment. Further benefits are available to provide you with peace of mind, such as insurance packages for your Mercedes and other insurance services for the whole family. You also get free entry to the Mercedes-Benz Museum simply by showing your VISA MercedesCard. Further details can be found at [www.mercedes-benz.de/mercedescard](http://www.mercedes-benz.de/mercedescard)<sup>1</sup>

### **Mercedes-Benz Financial Services.**

Mercedes-Benz stands for quality, innovation and safety – and the same applies to Mercedes-Benz Financial Services. Our innovative leasing and financing products are tailored to your financial needs and means, making it easy for you to secure the keys to your dream car. Once you are on the road, our insurance products offer you comprehensive protection on every trip. Finally, our service products ensure that your car is always in tip-top condition whilst keeping costs transparent and easily manageable. For a detailed quotation, please contact your Mercedes-Benz dealer, who will be glad to go through the latest financial services and terms and conditions with you.

**Mercedes-Benz mobility.** Your new car comes complete with the promise of feeling safe on the road, but if you should ever need assistance, then Mercedes-Benz Service24h is there to help. Just call the freephone service hotline on 00800 1 777 7777<sup>2</sup>. The newly integrated telematics service, Mercedes-Benz Contact<sup>3</sup>, is even more customer friendly: a touch of a button is all it takes to contact the Mercedes-Benz customer centre. If you wish, the relevant vehicle and position-related data can be transmitted at the same time, thereby allowing the centre to react quickly and provide rapid on-the-spot assistance. Also standard with your new car at no extra charge is the Mercedes-Benz Mobilo<sup>4</sup> mobility package. Whether you have lost your key, had a breakdown which cannot be repaired immediately or suffered damage to the vehicle due to an accident or vandalism, Mobilo is there to help you reach your destination – anywhere in Europe. Whatever your problem, one thing is certain: you will soon be able to resume your journey.

**Service packages.** Vehicle-specific services allow you to put together an individual package for your Mercedes, including long-term protection against unforeseeable repair costs and high-quality servicing with genuine Mercedes-Benz parts. You can also count on the extensive network of Mercedes-Benz workshops, where you will receive the usual high standard of service for your Mercedes at a predictable, fixed price. Please ask your Mercedes-Benz dealer for further details.

**Test drive.** The unique feeling of driving a Mercedes cannot be put into words. Which is why we'd like to invite you to experience it for yourself. Take a test drive and find out first hand how it feels to drive your dream car. Simply visit [www.mercedes-benz.com](http://www.mercedes-benz.com) to locate the nearest Mercedes-Benz dealer in your country or region.

**Interactive Owner's Manual.** The website also offers an interactive tour, enabling you to take a closer look at your desired model. These informative clips are the ideal way to acquaint yourself with your dream car. You can view key functions in detail, gain an insight into the car's inner workings or look at the benefits of each model. For further details, go to: [www.mercedes-benz.de/owners-manual](http://www.mercedes-benz.de/owners-manual)

**Mobile internet.** Now you can access the entire world of Mercedes-Benz from your mobile phone. As well as an overview of all the passenger car models, there are insights into the entire brand world along with a wealth of entertainment offers and direct links to our range of services at [www.mercedes.mobi](http://www.mercedes.mobi)

<sup>1</sup> Information about the MercedesCard in Austria and Switzerland can be found on the Mercedes-Benz websites for these countries <sup>2</sup> Alternative: +49 69 95 30 72 77 <sup>3</sup> Requires a factory-fitted radio, connected to an operational mobile phone

<sup>4</sup> Once the warranty has expired, Mobilo can be extended in periods of one year for a maximum of 30 years, provided that regular maintenance is carried out by your Mercedes-Benz service partner

NON-METALLIC PAINTS

METALLIC PAINTS

**Take-back of end-of-life vehicles.** Coming full circle. At the end of its long life, you can return your R-Class to us for environment-friendly disposal in accordance with the EU End-Of-Life Vehicle Directive<sup>1</sup>. But that day lies a long way off.

<sup>1</sup> Applies in accordance with national regulations to vehicles up to 3.5 tonnes gross weight. Mercedes-Benz passenger cars have met the statutory regulations governing the suitability of their design for reuse and recycling for a number of years now. A network of vehicle take-back depots and dismantlers has been established which will process your vehicle in an environment-friendly manner. The ways in which both vehicles and parts can be recovered are subject to ongoing development and improvement. Consequently, the R-Class will be able to comply with any future increases in the recycling quota within the stipulated time limits. For further information please refer to [www.mercedes-benz.com](http://www.mercedes-benz.com)

**Please note:** changes may have been made to the product since this brochure went to press (04.02.2011). The manufacturer reserves the right to make changes to the design, form, colour and specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the vendor or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be derived solely from these. The illustrations may show accessories and items of optional equipment which are not part of standard specification. Colours may differ slightly from those shown in the brochure, owing to the limitations of the printing process. This brochure is distributed internationally. It provides a general indication of the range of models, features, optional extras and/or colours available in various countries. Some of the models, features, optional extras and/or colours may not be available in your country, or may only be available in a different specification. Additionally some models, features, optional extras and/or colours may only be available in combination with others. For current and more specific information in relation to the range of models, features, optional extras and/or colours available in your country, and their pricing, you should contact your nearest authorised Mercedes-Benz Passenger Car Dealer.
